GARDENING WITH A MISSION

Growing food and learning about the natural world

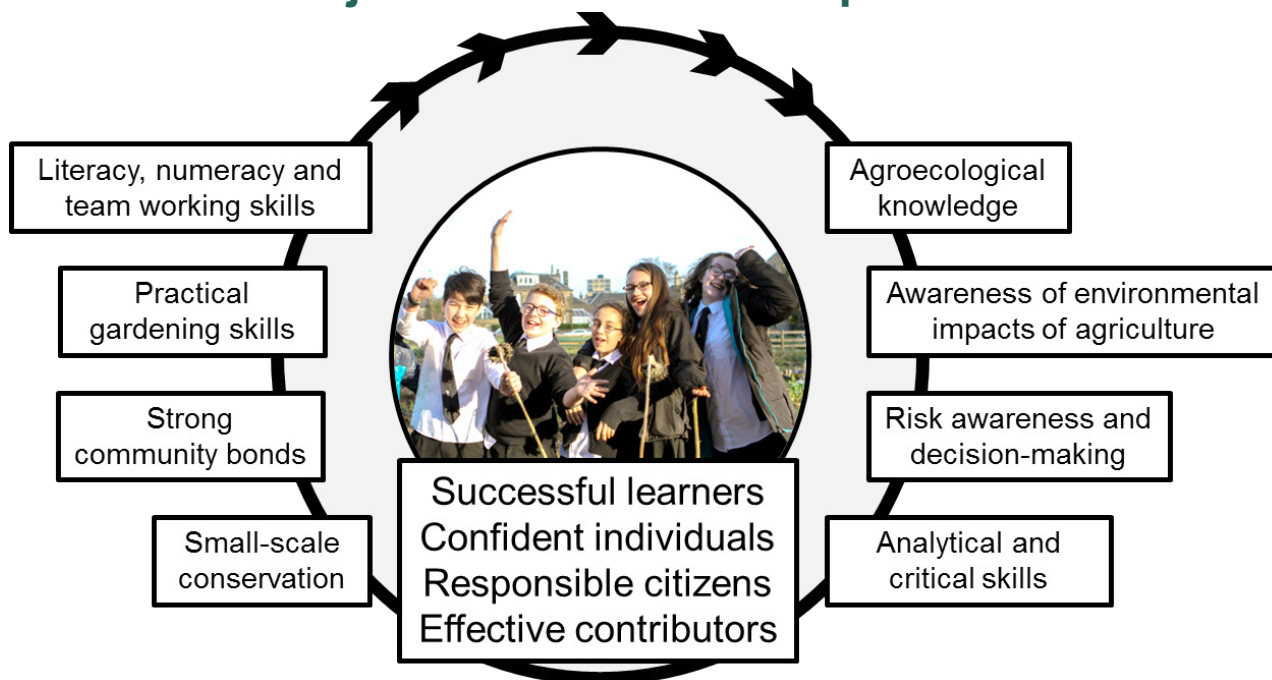

Small allotments, big ideas:

- Teaching pupils how to grow food
- Valuing farming and land resources
- Finding joy in nature experiences
- Strengthening community links

Audience and learning context:

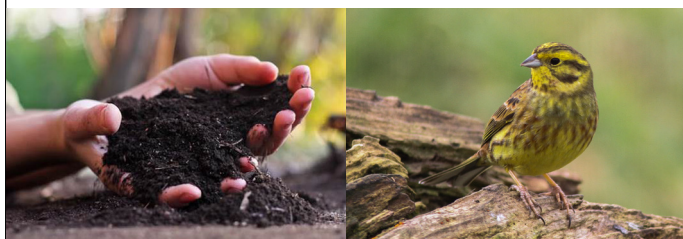

- First year secondary school pupils within the Scottish Curriculum for Excellence
- Gardening Club set up at Trinity Academy
- Presentations, discussions, games, and outdoor gardening

Project outcomes and impact

Core topics:

- Plant interactions and life cycles
- Environmental impacts of agriculture
- Wildlife-friendly farming as a way to build stronger communities

Future directions:

My legacy lives in the future work of my bright and enthusiastic pupils. In 2017, they hope to attract more members to Gardening Club and exchange experience with other schools.
